DETAILED ACTION

Response to Amendment

1. This action is responsive to the Amendment filed on 21 December 2006. Claims 1, 7, 9, and 12 have been amended. New claims 14-16 have been added. Claims 7-12 had been previously withdrawn, but have been rejoined in this action. Claims 1-16 are pending in the application.

Election/Restrictions

2. Claims 1-6 and 13-16 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 7-12 are directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, claims 7-12 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 13 December 2005 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the

provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Response to Arguments

3. Applicant's amendment and arguments, filed 21 December 2006, with respect to claims 1-16 have been fully considered and are persuasive. The rejections of claims 1-6 and 13 have been withdrawn. The examiner agrees that the McFarland et al. reference (U.S. Patent No. 6,960,031) does not disclose or make obvious the newly added limitation where the protruding portion protruding from the front surface of the substrate is removably engageable with the alignment hole of the optical component.

Allowable Subject Matter

4. Claims 1-16 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent Application Publication No. 2003/0007717 to Chiappetta et al.

U.S. Patent No. 6,741,778 to Chan et al.

Each of these references discloses an device and method similar to that of the claimed invention. Neither reference discloses or makes obvious the limitation where

the protruding portion protruding from the front surface of the substrate is removably engageable with the alignment hole of the optical component.
